

City of Dryden  
Sandy Beach Park is Now Open  
July 21, 2017

Please be advised Sandy Beach Park has been reopened to the Public.

The extended closure was due to limited access to the park by equipment due to wet conditions over the last several weeks. City crews required time to clean up and address safety concerns created by the intense winds on the evening of June 14/2017 including the cleanup of many fallen trees and branches.

Damage to the Beach Area due to the winter ice on the lake last year was also addressed during this time.

Public Works would like to thank the Ministry of Natural Resources for their assistance during this clean up. Public Works apologizes for any inconvenience and would like to thank you for your co-operation during this time.

Blake Poole  
Manager of Public Works
